

New York City Taxi and Limousine Commission

Notice of Promulgation of Rules

Notice is hereby given in accordance with Section 1043(b) of the Charter of the City of New York (“Charter”) that the Taxi and Limousine Commission (“TLC”) promulgates rules to amend the taxicab vehicle specifications, clarify driver fitness hearing procedures and to permit TLC to increase driver TIF and SHLIF payments if funds permit. These rules are promulgated pursuant to Sections 1043 and 2303 of the Charter and Section 19-503 of the Administrative Code of the City of New York. These rules were published in the City Record on March 23, 2018 for public comment. On April 25, 2018, a public hearing on these rules was held by the TLC at its offices at 33 Beaver Street, 19th Floor, New York, New York, and the rules were adopted by the Commission on May 7, 2018. Pursuant to Section 1043(c)(1)(c) of the Charter, these rules will take effect 30 days after publication.

Statement of Basis and Purpose of Proposed Rule

The rules described below amend medallion taxi specifications to provide medallion owners more flexibility when purchasing a vehicle and apply the uniform seven-year retirement date for the small portion taxicabs hacked up before April 20, 2015 and given a retirement date of less than seven years.¹ TLC can amend these rules without altering or affecting the City’s commitment to make the medallion taxi fleet fifty percent accessible. The rules also permit TLC to provide additional monetary incentives for drivers who choose to drive accessible yellow or green taxis. Additionally the rule memorializes the longstanding practice that all Chair decisions regarding fitness of a licensee after a criminal conviction are a written explanation.

Increased Taxi Vehicle Choice

The TLC rules amend and clarify specifications that apply to vehicles that are placed into service as a taxicab. These rules would permit more choice to licensees purchasing a vehicle and apply uniformly TLC’s vehicle retirement rule.

The rules amend the specifications for gas-powered and hybrid electric taxicabs to permit the use of midsized gas-powered and hybrid electric sedans, in addition to the Nissan NV200 Taxi of Tomorrow. The current rules permit owners to hack-up only the Nissan NV200 Taxi of Tomorrow and a limited number of larger hybrid vehicles. Drivers have expressed a preference for purchasing and leasing midsized hybrid electric sedans. Midsized sedans have a high rate of use in the For-Hire-Vehicle sector, and the high number of trips completed in these vehicles

¹ Under current TLC rules, taxis hacked-up before April 20, 2015 received a retirement date between three and seven years after the vehicle was placed into service. Vehicles hacked-up on or after April 20, 2015 all received a seven-year retirement date.

suggests passengers will similarly use these vehicles if available in the taxi sector. In addition, midsize hybrid electric vehicles are often more fuel efficient than larger hybrid models, which means drivers will operate their vehicles more cost efficiently.

To clarify which vehicles may be used with each type of medallion, the rules also include a new rule section listing the vehicle specifications that apply to the different types of medallions. Specifically, the rules provide:

- Owners and lessors of Unrestricted Medallions who are not otherwise required to purchase an accessible vehicle may use the Nissan NV200 Taxi of Tomorrow, the Accessible Nissan NV200 Taxi of Tomorrow or a gas or hybrid electric vehicle that meets TLC's non-accessible vehicle specifications;
- Owners and lessors of Unrestricted Medallions who are required to purchase an accessible vehicle must use the Accessible Nissan NV200 Taxi of Tomorrow or apply for one of the 496 waivers to use another accessible vehicle that meets TLC's accessible vehicle specifications;
- Owners and lessors of Accessible Medallions may use any accessible vehicle that meets TLC's accessible vehicle specifications, which includes the Accessible Nissan NV200 Taxi of Tomorrow; and
- Owners and lessors of Alternative Fuel Medallions may use any hybrid electric vehicle that meets TLC's non-accessible vehicle specifications.

The rules would also allow owners to hack-up used taxi vehicles. Current TLC rules permit vehicle owners in other segments of the industry to purchase new or used vehicles. Used vehicles are operated safely today in these other segments as they must first pass TLC's comprehensive vehicle safety and emissions inspection before being licensed to operate for-hire. Permitting owners to purchase used vehicles offers the potential of savings compared the cost of purchasing a vehicle. Since 1996, only new vehicles with 500 or fewer miles could be hacked-up as a yellow taxicab. Beginning in January 2015, TLC began testing the use of used vehicles in yellow taxicab service in its Used Vehicle Taxicab Pilot. The results of this pilot revealed no statistical difference in vehicle inspection results between vehicles placed into service when new or when used. The pilot further found that owners preferred purchasing a used vehicle due to the resulting cost savings. Accordingly, the rules would permit the use of used vehicles as yellow taxis. As in the pilot provisions, used vehicles would receive the uniform seven-year retirement date less the age of the vehicle at the time the vehicle is placed into service.²

Finally, under current TLC rules, taxis on the road today that were placed into service before April 20, 2015, were assigned a retirement date between three and seven years, while taxis placed into service on or after April 20, 2015, all received a retirement date seven years after hack-up. It is TLC's experience that, due the recent general improvement in vehicle quality and reliability, it is unnecessary to distinguish between the retirement dates of taxicabs placed into service before and after April 20, 2015. Since all taxicabs on the road are held to the same high standards and cannot operate unless they pass the TLC vehicle safety and emissions inspection,

² Vehicle age at hack-up is determined by the difference in years between the model year of the vehicle and the calendar year the vehicle is placed into service as a taxicab. For example, a model year 2016 vehicle hacked-up in 2018 is two years old and, as such, would be assigned a retirement date five years after hack-up.

the rule applies the seven year retirement date to the remaining taxicabs that were originally assigned a retirement date of less than seven years.

Rule Clarifications and Revisions

The rules revision also:

- Codifies existing practice that a decision to revoke a license based on fitness review by the Chairperson must be in writing and must provide an explanation of the relationship between the criminal conviction and licensure and the reasons why criminal conviction renders the licensee unable to safely transport passengers.
- Enables TLC to combine the vehicle and driver funds of each of the Taxicab Improvement Fund (“TIF”) and Street Hail Livery Improvement Fund (“SHLIF”). TLC expects that this will permit an increase in payments made to drivers after a review of available funds as well as volume of payments made to drivers and vehicle owners, dependent on the number of drivers operating accessible vehicles and number of accessible vehicles in service, respectively.
- Removes the requirement that Taxicab Models be crash tested with the partition in the vehicle. Vehicles must be crash tested in accordance with federal requirements; the TLC’s additional requirement of crash testing with the partition in the vehicle is no longer needed, since TLC rules no longer mandate partitions.

TLC’s authority for these rules is found in section 2303 of the New York City Charter and section 19-503 of the New York City Administrative Code.
